Meta Kongz

MKC TOKENOMICS

A main token in the Meta Kongz ecosystem

MEKONG COIN

Introduction (MKC)

META KONGZ and MKC

Meta Kongz is a Klaytn-based PFP project and aims to create a MULTI-UNIVERSE that combines various ecosystems through NFT.
Users can not only produce Baby Kongz by breeding two Meta Kongz with MKC, but also get varied NFTs by expanding the ecosystem.
Plus, MKC is going to play a key role and be used for trading in the Meta Kongz Market MKC Logo MKC END 2 ecosystem.
In addition, by utilizing MKC, you can freely exchange your opinions through the governance function.
We are actively exploring various uses to expand our Meta Kongz and MKC ecosystems.

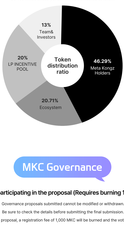
Tokenomics

Issue

MKC is a deflation model that will be created for 10 years, one per block.
Additional issuance is not allowed, and this means approximately 86,400 MKCs are issued per day, with a total supply of 315,360,000.
However, 600,000 MKCs are created at the time of the initial distribution for publicity and
LP pool generation and the price is formed through the initial supply.
This is equivalent to about a week's supply of inflation, so the final supply of MKC is 315,360,000 + 600,000 = 315,960,000.

Token Distribution

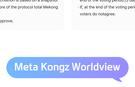
86,400 MKCs based per day will be distributed as follow.



MKC Governance

Criteria for participating in the proposal (Requires burning 1,000 MKC's)

Governance proposals submitted cannot be modified or withdrawn.
Be sure to check the details before submitting the final submission.
When submitting a proposal, a registration fee of 1,000 MKC will be burned and the voting period is 3 days.



Approval Criteria

- When the total number of voters exceeds the minimum participation criterion. (the minimum participation criterion is based on a snapshot at the beginning of voting, 30% or more of the protocol total Mekong Coins)
- If more than half of the total voters approve.

Rejection Criteria

- In case of participation below the minimum number of votes by the end of the voting period (3 days)
- If, at the end of the voting period, a majority of the total number of voters do notagree.

Meta Kongz Worldview

Let me introduce Meta Kongz Universe: KONGZ SOCIETY, the worldview of Meta Kongz

Breeding

1. Breeding Price
240 MKC . (Changeable through a governance vote in the future)

2. Number of breeding
There is no limit for breeding, however, the Meta Kongz used in the breeding can breed again after a week of rest after the breeding and after all of the 40,000 Baby Kongz have been bred, the breeding system won't be available.

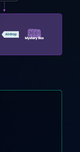
3. Baby Kongz
A total of 40,000 Baby Kongz can be created. When it is created, it is minted in the form of an unrevealed box with a cover avatar and can be traded on the secondary market such as OpenSea.

Worldview expansion

The Baby Kongz will have two different paths

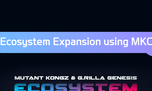
1. Pure Kongz (PURE BLOOD)
In the direction that contains the life of Kongz, he is reborn as a ghost through his childhood, adolescence, and old age.
A certain amount of MKC and wears from the previous stage are incinerated at each rebirth.

2. Hybrid Kongz (MIXED BLOOD)
This is a creature that can be bred between Meta Kongz and other species in a different ecosystem. (Different projects)
A certain amount of MKC and the previous Kongz will be burned at each stage to go to the next stage.



Meta Kongz UNIVERSE

KONGZ SOCIETY



Two Meta Kongz NFTs and MEKONG COIN *are used for breeding*

MEKONG is required to breed

- Wearable functions will also be opened for Baby Kongz, Teenager Kongz, Grandpa/Grandma Kongz, Mixed Kongz and Mixed Blood.

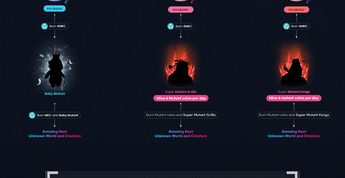
Ecosystem Expansion using MKC

MUTANT KONGZ & G.R.L.L.A GENESIS

ECOSYSTEM

The multi-universe world of 10,000 Mutant Kongz and 10,000 Mutant G-Rlla!
Mutant Kongz and Mutant G-Rlla will be born!
The beginning of a brand-new **crypto-economy of kongz and Rlla** along with Meta Kongz universe world!
Mutant Kongz and Mutant G-Rlla will be born through the Mutation Lab.
Mutant Kongz and Mutant G-Rlla will be born through breeding and incinerating Baby Kongz and Mutant G-Rlla.
Now! You can choose three options.
What's your choice?

PEACE OR WAR



- MUTANT ECOSYSTEM NOTICE -

1. Mutant Kongz & Mutant G-Rlla mine MKC. But Super Mutant Kongz and Super Mutant G-Rlla can't mine MKC.
(MKC mining volume of Mutant Kongz and G-Rlla increases with each burned MKC)
2. Super Mutant Kongz and Super Mutant G-Rlla mine Mutant coins.
(Mining volume of Mutant Kongz and G-Rlla increases depending on the proportion of the wardrobe and ways to burn Mutant coins.)
3. Mining volume of Mutant Kongz & Mutant G-Rlla will be determined by vote through Governance.
4. The mutant pet's skill will be announced later.
